DETAILED ACTION

General Status

1. This is a Final Action on the Merits. Claims 1-19 are pending in the case.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

3. Claims 16, 17 and 19 are rejected under 35 U.S.C. § 102(e) as being anticipated by Laor (US 6,097,860).

For claim 16, Laor, in figure 18, discloses a tap system for an array of optical beams, comprising a beam splitter 46 (figure 10), the beam splitter comprises two prismatic elements 50, 52, and the interface surface or substrate is at an angle to the incoming beam, (see figure 11), the substrate reflects a portion of each of the incoming beam, an array of detectors 78 (figure 18), each one of the detector detecting the reflected portion of the optical beam. For claim 17 and 19, the substrate, etc. are disclosed in figures 20 and 22.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 18 is rejected under 35 U.S.C. 103(a) as being unpatentable over Laor (US 6,097,860).

As discussed above, Laor satisfies the limitation of claims 16, 17 and 19. However, Laor does not disclose standoffs. In so far as standoffs are concerned, it would have been a matter of design choice, to one of ordinary skill in the art to provide aligning distance between the beam splitting substrate and the detector substrate.

Allowable Subject Matter

6. Claims 1-15 are allowed.

Response to Arguments

7. Applicant's arguments filed 7/7/2003 have been fully considered but they are not persuasive. The applicant amended independent claims 1, 14, and 15, but claim 16 was not amended. The Examiner has withdrawn the rejection of claims 1, 14 and 15 including all the depending claims. Regarding claim 16, the argument that the reference does not an array of beams, the Examiner would like to point out to figure 18 of Laor '860, which discloses a

plurality of beams, splitters and detectors, thus constituting an array. The claims 16-19 are rejected based on the same art.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
